

A PHILOSOPHY OF SOFTWARE DESIGN

whose interfaces are much simpler than their p40w0
interfaces are much simpler than their implementations p40w1
are much simpler than their implementations Such p40w2
much simpler than their implementations Such modules p40w3
simpler than their implementations Such modules have p40w4
than their implementations Such modules have two p40w5

A PHILOSOPHY OF SOFTWARE DESIGN

than their implementations Such modules have two p80w0
their implementations Such modules have two advantages p80w1
implementations Such modules have two advantages First p80w2
Such modules have two advantages First a p80w3
modules have two advantages First a simple p80w4
have two advantages First a simple interface p80w5

A PHILOSOPHY OF SOFTWARE DESIGN

have two advantages First a simple interface p120w0
two advantages First a simple interface minimizes p120w1
advantages First a simple interface minimizes the p120w2
First a simple interface minimizes the complexity p120w3
a simple interface minimizes the complexity that p120w4
simple interface minimizes the complexity that a p120w5
