

than their implementations Such modules have two p10w0
their implementations Such modules have two advantages p10w1
implementations Such modules have two advantages First p10w2
Such modules have two advantages First a p10w3
modules have two advantages First a simple p10w4
have two advantages First a simple interface p10w5
two advantages First a simple interface minimizes p10w6
advantages First a simple interface minimizes the p10w7

simple interface minimizes the complexity that a p20w0
interface minimizes the complexity that a module p20w1
minimizes the complexity that a module imposes p20w2
the complexity that a module imposes on p20w3
complexity that a module imposes on the p20w4
that a module imposes on the rest p20w5
a module imposes on the rest of p20w6
module imposes on the rest of the p20w7

the rest of the system The best p30w0
rest of the system The best modules p30w1
of the system The best modules are p30w2
the system The best modules are those p30w3
system The best modules are those whose p30w4
The best modules are those whose interfaces p30w5
best modules are those whose interfaces are p30w6
modules are those whose interfaces are much p30w7
